

Welcome to the **MONKEY BABY BUSINESS** Launchpad!

Before you can launch with us, we have a few requirements & deliverables needed from your project to ensure that we have all of the information we need to make your project a success.

- Contact Person
- Project Name
- Twitter Link
- Website URL
- Discord Invitation URL
- How many NFTs you intend to mint in your collection
- Price of each NFT
- What % royalties do you want to charge on marketplaces after your mint?
- Launch Date
- Authority Wallet – the wallet address you want your SOL proceeds to go into
- A .zip file containing 2 folders (png / json). Each .png should match its corresponding .json file with the metadata. If you need assistance with this, please let us know.

Rules & Policies:

1. Your mint price cannot change after it is deployed in the smart contract.
2. If you decide to change your mint price post-deployment, our % fee will be adjusted to reflect our initial share pre-price change.
3. Our standard fee model includes the scope of services initially discussed with you. If you require custom or specialized features, we will need to discuss this ahead of time.
4. Revenue Share/Royalties can be negotiated on a case-by-case basis.

THANK YOU!
